## Section 1.—General Notes.

1. **Basis of establishment and outfit.**—The tables contained in this Manual are drawn up on the basis of a campaign in a civilized country, and in a temperate climate. When mobilization is for a campaign under different conditions, certain modifications will become necessary, and will be notified from the War Office.\*

2. **War establishment.**—The normal war establishment of an infantry battalion, showing its composition as regards personnel and animals, is given in Section 2, and no men or horses in excess of the "total battalion" will be allowed to accompany the unit in the field, except as provided for in para. 9 and footnote.†

The transport officer shown in italics (p. 8), is not included as such in the total battalion, but forms part of the company establishment of officers.

For purposes of administration, the details of battalion headquarters including the machine gun section (other than the battalion commander, senior major, adjutant, medical officer and quartermaster) are posted to companies of the battalion as supernumerary to the establishment of platoons. Their distribution is at the discretion of the battalion commander, but should be so arranged that the numbers so posted to companies shall be approximately equal.

With the exception of the warrant officer and staff serjeants, the details of the battalion headquarters and machine gun section (other than officers) will sleep and mess with their companies, or otherwise as the battalion commander may direct.

3. **Transport.**—The transport of a battalion is shown after its war establishment. The transport is divided in the field as follows:—

1st line.—(which always accompanies the battalion on the march): S.A.A. and water carts; G.S. limbered wagons for tools; Maltese cart; limbered wagon for machine guns; pack and spare animals; and cooks' wagon or travelling kitchens.

Train transport (under the A.S.C.): G.S. Wagons.

The four G.S. wagons, train transport, are numbered consecutively and allotted as follows:—

**Baggage section.**—Nos. 1 and 2, baggage and general stores.

No. 1 carries for "A" and "B" companies and attached details, and No. 2 carries for "C" and "D" companies and attached details. In addition the wagons share the balance of regimental equipment, not belonging to companies.

**Supply section.**—Nos. 3 and 4, supplies.

\* This manual has been based on War Establishments, Part I, Expeditionary Force, 1914, and on A.F. G. 1088-43 dated February, 1914.

† In the case of units which have not exchanged their cooks' wagon for 4 travelling kitchens, the establishment will be decreased by 3 drivers and 6 draught horses.

**A.S.C. drivers.**—The train transport is provided by the Army Service Corps. When in the field, rations, &c., for these men and horses are carried by the company of the train to which the men and horses belong.

Spare drivers for train transport are included in the war establishment of the Army Service Corps company of the train to which the drivers belong. One man per wagon and one N.C.O. per battalion will be detailed to accompany the train wagons of the unit.

The personnel and animals of the A.S.C. train transport allotted to the battalion will accompany it by rail and overseas, joining the A.S.C. train on arrival in the area of concentration.

4. **Horses, spare.**—Spare draught horses are allowed at the rate of 10 per cent. A driver is allowed for each pair of spare horses.

**Veterinary arrangements.**—The horses and transport animals of an infantry battalion belonging to a division are in the veterinary charge of the veterinary officer with the Infantry Brigade Headquarters. Those of the battalion with army troops are in charge of the veterinary officer with the army troops train. The director of veterinary services or his representative with the headquarters of the inspector-general of communications will detail a veterinary officer to take charge of the animals of a battalion on the lines of communication.

**Shoeing.**—The shoeing of horses and transport animals will be carried out by the battalion cold shoers, assisted by the farriers of the Army Service Corps company to which the train drivers of the battalion belong.

5. **Medical and sanitary arrangements.**—An officer for medical charge, and rank and file for water duties, &c., are provided by the R.A.M.C. One N.C.O. and eight privates per battalion are trained in sanitary duties. On arrival in camp, billets, or bivouac, they are available for sanitary duties, and are placed under the orders of the medical officer for camp sanitation purposes, working in conjunction with the R.A.M.C. personnel attached. At all other times they take their places in the ranks.

6. **Bâtmen.**—Bâtmen in the field are allowed at the rate of one for each dismounted officer, or mounted officer with one horse, and two for each mounted officer with two horses.

All bâtmén are fully armed and trained soldiers, and are available for duty in the ranks.

7. **Reinforcement.**—Drafts to replace wastage are calculated for infantry at the rate of 44 per cent. for the first six months, or 80 per cent. during the first year of a war. The first portion of these drafts is known as "first reinforcement," and is calculated at 10 per cent. of rank and file. The first reinforcement mobilizes with the battalion, but, unless otherwise ordered, will not accompany it when it leaves its place of mobilization. Special instructions will be issued for the movement of these details.

Other details shown in the table as "left at the base" also mobilize with the battalion; the orderly room serjeant is detached

to join the A.G.'s office at the base; the remainder are attached with the first reinforcement to one of the infantry base depôts.

8. **War outfit.**—War outfit is the material of all kinds which a unit requires for war.

The method of carrying it is laid down in Sections 3-7.

(a) **Ordnance stores.**—The ordnance stores required on mobilization are laid down in the mobilization store table for an infantry battalion (expeditionary force).

(b) **Clothing and necessaries.**—The clothing and necessaries required on mobilization are detailed in the Regulations for the Clothing of the Army, Part III.

(c) **Supplies; and medical equipment.**—Details of the scale of supplies will be found in War Establishments and Allowance Regulations; medical equipment in Regulations for the Medical Services of the Army.

(d) **Stationery.**—The stationery considered necessary for an infantry battalion in the field is shown in "Tables of Books, Army Forms and Stationery taken into the field by units of the Expeditionary Force," issued with Army Orders. A list of contents is pasted inside the lid of each stationery box.

9. **Blankets.**—Blankets for personnel are not included in the normal scale of war outfit; but, when specially ordered, one blanket per man will be carried. This necessitates an addition of two G.S. wagons to the normal scale of transport; the extra personnel, horses and vehicles required, are shown in a note on the War Establishment table (page 11). The blankets may be distributed, as found convenient, between the additional G.S. wagons and Nos. 1 and 2 G.S. wagons allotted for the carriage of baggage and stores.

10. **Replenishment of stores.**—General requisites, such as spare parts, and materials for repair, are calculated on the assumption that it will be possible to replenish them at intervals of about a fortnight.

11. **Mobilization.**—The arrangements for bringing a battalion up to War Establishment in men and horses, and for the completion of its war outfit are laid down in Mobilization Regulations.

Orders for movement, when mobilization is complete, will be issued from the War Office to General Officers Commanding-in-Chief.

## F.—MOUNTED MEN.

The transport serjeant and regimental drivers are clothed and equipped, as are other infantrymen (Table C), with the following exceptions:—

(a) Bedford cord pantaloons are worn instead of service dress trousers, and cotton instead of woollen drawers; each man has a pair of jack spurs. Regimental transport personnel of kilted regiments will also wear boots instead of Highland shoes, and puttees instead of gaiters. Chin-straps will be supplied to men wearing glengarry caps.

(b) Intrenching implements are not carried.

(c) Each driver has a whip and legging.

The following are carried on the horses of the transport serjeant and regimental drivers:—

Articles.	Transport Serjeant (on the horse).	Drivers.		Approximate weight of each.	
		Near horse.	Off horse.	lbs.	ozs.
Bags, nose, G.S., each with 6 lbs. corn	1	...	2	7	0
Brushes, horse	1	...	2	0	10
Harness	...	1	1	73	0
				75	0

Ropes, picketing	1	1	1	0	15
Rubbers, horse	1	...	2	0	4
Saddlery, complete, with saddle blanket and headrope	1	..	...	29	4

Instructions for A.S.C. drivers will be found in A.S.C. training, Part I. Special picketing gear is allowed for their heavy draught horses.

Men leading pack animals are clothed as drivers.

Rifles of drivers of G.S. limbered wagons, carts, S.A.A. and water tank, will be carried in the clips provided on the wagon for that purpose. On vehicles not specially fitted the rifles will be carried on wagon footboards.

## NOTES.

**Packs.**—The packs of the transport serjeant and of the regimental drivers of 1st line transport vehicles may be carried on the vehicles. Those of drivers of spare horses and of pack animals will be on the man.

**Saddle blanket.**—Under the riding or pack saddle. Saddle blankets for officers' horses and horses with luggage saddles are carried in the vehicles, on the march.

Heelropes are allowed for use with restive horses on a scale of 25 per cent. An additional peg is issued with each heel rope.

**Picketing gear** (or any part of it) may, at the discretion of the commanding officer, be carried in the regimental transport vehicles. A proportion of mallets, heelpeg (about 1 to 20 horses) will be carried on 1st line transport vehicles.

**Nose bags.**—When luggage saddle is worn on the off horse, one bag on each side of the luggage saddle is fastened to the near arch (or ring with O.P. saddle).

Carried in the wagon when luggage saddle is not worn.

**Horse brush and rubber.**—The method of carrying is left to the discretion of officers commanding, except that these articles are not to be in the nosebag.

#### G.—ARTICLES LEFT AT THE BASE FOR EACH MAN.

Kit bags, containing the spare kit detailed below, will be handed over to the O.C. base details to be taken to the overseas base with the base details, and will be left in charge of company storemen at the Infantry Base Depot to be forwarded only as may be deemed convenient to the Service by the Commander-in-Chief.

**Section 6.—CART AND WAGON LOADS.**

The distribution of the loads carried by transport vehicles, shown in this section, has been arrived at after a series of packing trials, and a departure from it would only be justified by exceptional circumstances.

For purposes of calculation, the approximate load for a G.S. wagon with 2 heavy draught horses has been taken as 3,000 lbs. The weights of individual items in the loads, of different marks of wagons, and of individual wagons of the same Mark may be found to vary.

The articles of "wagon equipment"; and such articles of the "loads" as luggage saddles, spare wheels and poles, &c., which are required for general transport purposes, will at all times remain with the vehicles and are not to be left with the unit when vehicles return to retail.
